Android Posted by Anonymous on 27 March 2014 HelloHowever, I've already tried everything to set up my Telenet email address on my tablet lenovo, but it doesn't work I've tried both via pop3 and IMAP and I've also tried different input ports it's successful but on the output goes wrong every time, I always get the message of can not find the server, I have already contacted Telenet but they do not help me much, they can send someone but it will cost me 85 euros which seems a bit excessive to get an email address on a tablet, I hope you can advise me Configuration process Android Telenet Mail application Go to the Android home screen and open the application from the email icon. Enter your telenet.be e-mail address and the password of the Telenet e-mail account and click the manual configuration button. Select the IMAP account. Please provide the following details about the incoming screen configuration server. Username: Your email address is your username Password: Your password IMAP server: imap.telenet.be Security type: SSL Port: 993 Click the Next button Provide the following details about the server configuration on the output screen. SMTP server: smtp.telenet.be Port: 587 Security type: SSL Press the button Next Select the frequency to check your email (preferably every 15 minutes). Enter your account name and tap Done. Congratulations, now you can send and receive emails from telenet.be on your Android device. Tags: telenet email settings telenet email settings telenet email settings for android telenet.be email settings Your Telenet email address can be used for several programs Electronic mail. Before you can receive and send emails there, you will have to configure your email address. Many electronic mail programs automatically fill out the configuration for you. Very useful, the one has to fill in its own data? Then you will find the necessary information in this article. I know with your full complete teleNet and the associated password. Always choose secure password authentication in your settings. Have you changed the password of your Telenet username or email address? Next, change the password of your e-mail program as well. 1 ADVANCED SOLUTION On this page you can find information about Telenet's webmail. It's about things like how to log in, login, IMAP, POP and SMTP settings, Frequently Asked Questions, email settings, password recovery, information for iPhone, Android and Windows Outlook users, Telenet apps, importing information for iPhone, Android and Windows Outlook users. Addresses from Outlook, blocking email addresses, setting auto-answer settings, creating message rules, creating folders and much more.Direct access to Telenet webmailThis link allows you to access your Telenet webmail account directly.If this does not work, you can also type the following url in your browser: What to do if you have forgotten your Telenet webmail username or passwordWhen you have forgotten your Telenet webmail password, you can request it through this web page. However, you need to be connected to a Telenet connection from your own home.This is how Telenet mail is configuredIn Telenet, customers can highly customize their mail environment. For example, you can set accessibility for your PC, smartphone, and tablet. You can set up a secure environment to receive and send mail. This is called an authenticated SMTP server. To receive emails securely, you can set up an IMAP. If one of your devices does not support IMAP, you can choose a POP3 connection.IMAP configuration for Telenet mailIMAP for incoming mail: Server name: imap.telenet.be Port: 993 Security type: SSL On Page users should log in with their full Telenet email address and associated password. Telenet offers offers Customers offer a free email account, such as [email "protected"] through the Telenet web mail, you can always read your emails, but of course it is very cumbersome. In addition, almost everyone uses a mobile device, such as an iPhone, iPad or Android device to read Emails,JE @ Telenet.be The email address of Telenet.be The right setup isn't always easy and settings aren't always easy to find on it either. Internet. However, this way you will find the correct configuration of Telenet email. These settings work on virtually any device (iPhone, iPad, Android, MacBook, Windows Computer) or via any email software (Microsoft Outlook, Windows Live Mail). Institutions for incoming email (IMAP): Host name: IMAP. TELET. BE NAME: [Email "protected"] Password: Board PasswordWord: Yes, SSL Port: 993 Configuration 'For outgoing email (SMTP): Host name: SMTP.TELENET.BE SECURITOR: Yes, to SSL POORT: 587 AUTHENTICATION REQUIRED: Do you get thrown abroad and makes your Telenet email suddenly no longer working? This is because you probably don't use authenticated SMTP. Configuration @ Telenet.be Email (iPad, iPhone, Android, Windows and Mac OS X) was last modified: January 16, 2016 by Thomas Thomas
